## **DETAILED ACTION**

### ***Election/Restrictions***

#### **Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, 35-74, 76-83, 87-98, 121, 122, 127-133, and 137-139, drawn to a composition, classified in class 524, subclass 403.
- II. Claims 32-34, 84-86, 99-120, 123-126, 136, and 140, drawn to a coated substrate, classified in class 428, subclass 626.

The inventions are distinct, each from the other because:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as an adhesive or extruded or cast film coatings and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Note that the method of preparing a composition claims (claims 121 and 122) have been groups with the composition claims (claims 1-31, 35-74, 76-83, 87-98, 127-133, and 13-139)

Art Unit: 1714

since not significant method steps are recited. In addition, the coating systems claims (claims 99-116 and 136) and the method of coating a substrate claims (claims 117-120 and 123-126) have been groups with the substrate claims (claims 32-34, 84-86, and 140) since all involve coating to substrates and no significant distinctions are considered to be present.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

#### Election of Species

##### *Species Group I*

Claims 1-74, 76-133, and 136-140 are generic to a plurality of disclosed patentably distinct species comprising rare earth compounds (e.g., species in instant claim 2). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

##### *Species Group II*

Claims 1-74, 76-133, and 136-140 are generic to a plurality of disclosed patentably distinct species comprising components that enhance corrosion resistance (e.g., species in instant claims 21, 23, 26, 79, and 92). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Art Unit: 1714

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each aforementioned group, i.e., pick a single group, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Due to the cumbersome nature of this election/restriction requirement, a telephonic election was not attempted.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1714

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
